<u>PRACTICE EXERCISES – SESSION – 1 (HTML)</u>
<u>Editor: Use Notepad++ / Bluefish / Visual Studio Code/equivalent</u>

REFERENCE: use the HTML Template file attached
Laboratory Exercises:
- Familiarize with HTML tags, attributes, elements
- Use Block level elements: <p>, <div>, <pre> <section><article><blockquote><canvas> <code>
- Use lists, Tables {<ol>,<li>,<table><tr><td>}
- insert images {<img>}
- Display the page in different browsers and check for any differences in page rendering
- Using Hyperlinks {<a>}
- Using styles and formatting {<style>}
- Understanding HTML DOM using *document.getElementById*

Try the following:

Design a layout for a web page using tables and organize content.

Alternately, you can use the tags as mentioned to create a webpage layout.
