

## **Exercise**

1. Make employee\_name as foreign key in WORKS and MANAGES, and make manager\_name as foreign key in MANAGES (all referencing EMP).
2. If an employee is deleted in EMP, the corresponding tuple should get deleted in WORKS and MANAGES, and the corresponding manager\_name should be set to a default value in MANGES.
3. Drop table EMP.
4. Truncate COMPANY.
5. Describe USER\_CONSTRAINTS.
6. Drop foreign key constraint on manager\_name.
7. Drop primary key constraint on COMPANY.
8. Add a column "date\_of\_joining" in employee.

## **Spot Questions**

1. List the names of employees who have joined in 2020s.
2. List the names of managers who have joined in 2020s.
3. List the names of employees living in Chennai and working in IBM.
4. List the names of employees working in the same city as they live.
5. List the names of managers living in Chennai and earning less than 50000 per month.
