

**B.E.- CSE – II yr – IV Sem (P) / CS6106 – DBMS LAB**

**13.03.2024 (AN)**

**Sailors** (sid: integer, sname: string, rating: integer, age: real);

**Boats** (bid: integer, bname: string, color: string);

**Reserves** (sid: integer, bid: integer, day: date);

1. Create the following table in continuation with above existing database

**day\_wise\_count(day: date, no\_of\_boards\_reserved)**

2. Create a trigger that updates the '**day\_wise\_count**' table whenever the '**Reserves**' table is affected/
