

## **Java Programming Lab – Week 4**

### **SPOT Exercises**

1. Write a program that prompts the user to enter a sequence of numbers and displays the distinct numbers in the sequence. Assume the input ends with 0, and 0 is not counted as a number in the sequence.
2. Modify question number 1 as follows:
  - a. Student can add course grade to only the courses entered by teacher.
  - b. Teacher can add the course only one time
