

UML Package Diagram. Design Elements

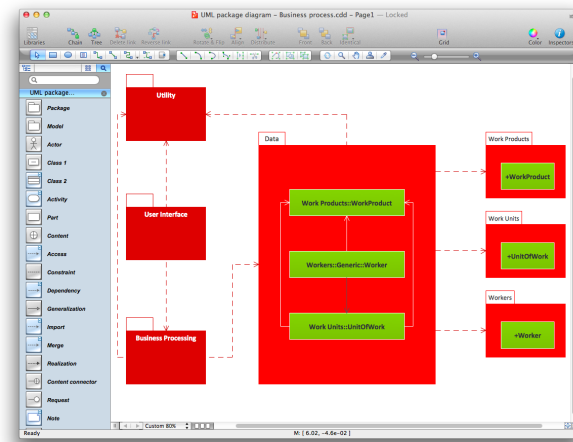

Try ConceptDraw Free

UML Package Diagram illustrates the functionality of a software system.

ConceptDraw has 393 vector stencils in the 13 libraries that helps you to start using software for designing your own UML Diagrams. You can use the appropriate stencils of UML notation from UML Package library.

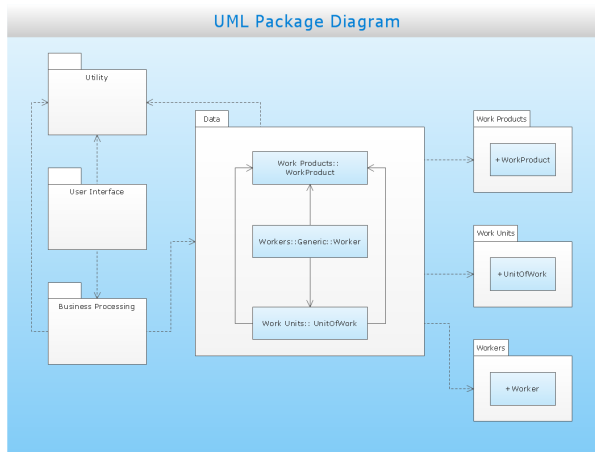

Diagramming Software for Design UML Package Diagrams

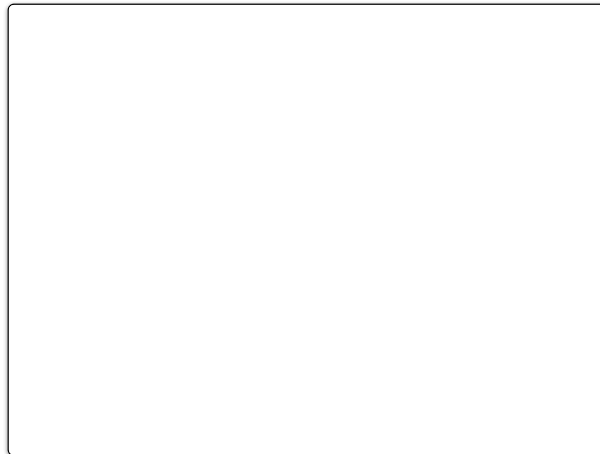

UML Package Diagram illustrates the functionality of a software system.

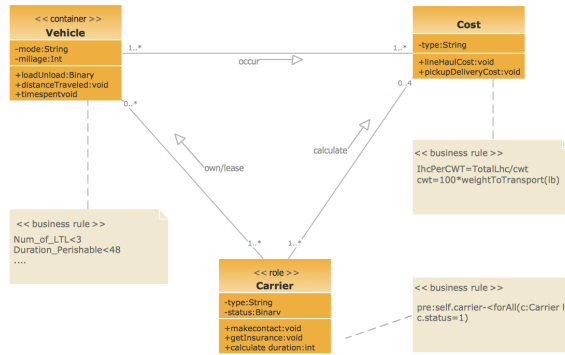

UML Package Diagram

UML Package diagramming software with rich examples and template.

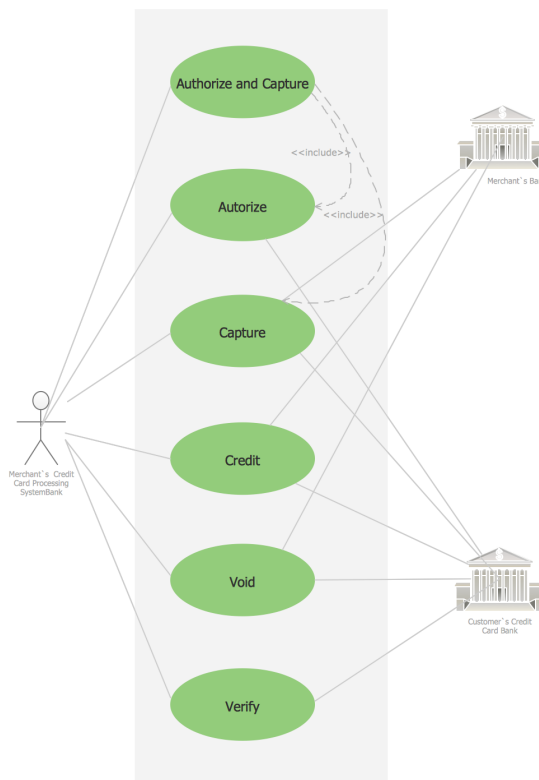

UML Class Diagram Example for Goods Transportation System

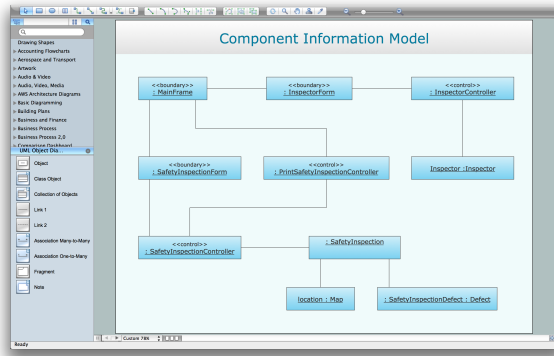

Class Diagram for Goods Transport System in UML. This sample was created in ConceptDraw PRO diagramming and vector drawing software using the UML Class Diagram library of the Rapid UML Solution from the Software Development area of ConceptDraw Solution Park. This sample shows the concept of working of the transport company and is used by transport companies, carriers at the transportation of various goods.

Credit Card Processing System UML Diagram

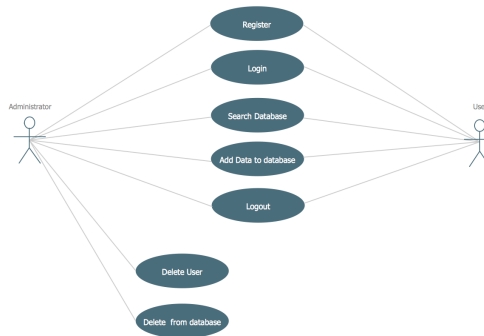

Credit Card Processing System UML Diagram. This sample shows the Use Case Diagram of the credit card processing system. You can see how the payment by credit card occurs. This sample can be used by the bank, financial enterprises, for understanding the work of the credit card processing system at the projecting the banking systems.

IMI Software

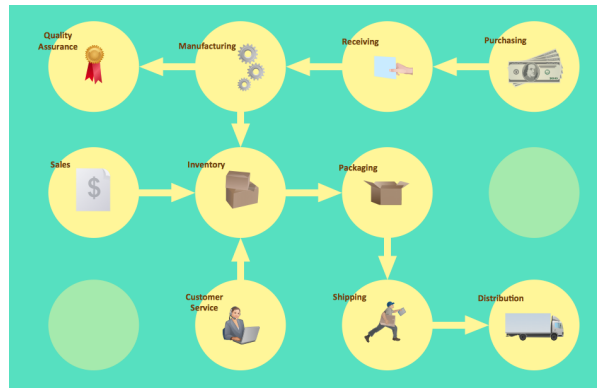

Unified Modeling Language (UML) is a language of graphic description for object modeling in the field of software engineering. UML was created for definition, visualization, designing of software systems. UML is an open standard that uses graphic notations for creating visual models of object-oriented software systems. The Rapid UML Solution for ConceptDraw PRO presents the intuitive RapidDraw interface that helps you to make the UML Diagram of any of these 13 types quick and easy.

UML Use Case Diagram Example Registration System

This sample was created in ConceptDraw PRO diagramming and vector drawing software using the UML Use Case Diagram library of the Rapid UML Solution from the Software Development area of ConceptDraw Solution Park. This sample shows the types of user's interactions with the system and is used at the registration and working with the database system.

Business Graphics and Diagramming Package

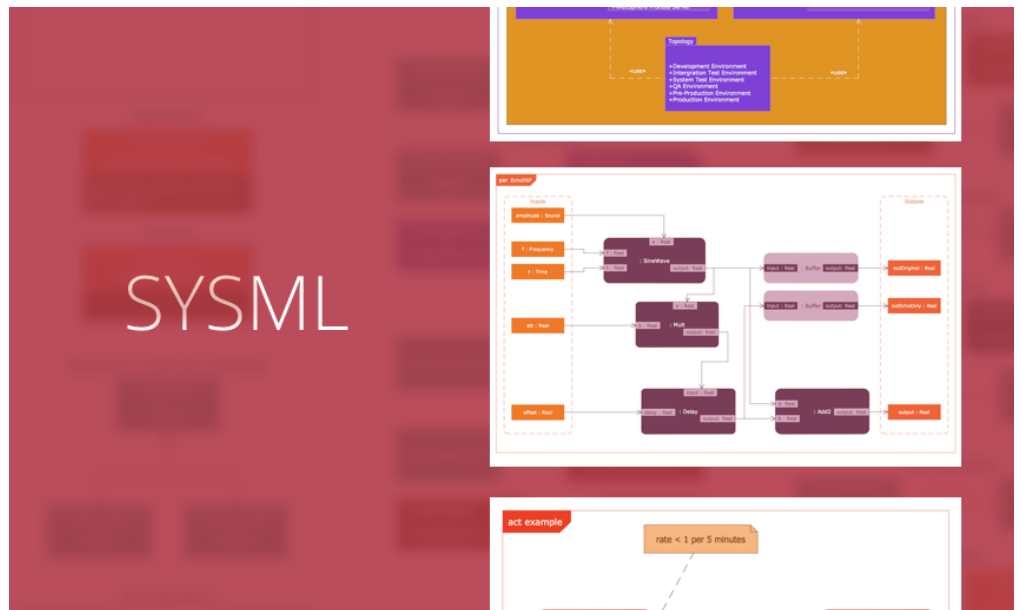

The innovative ConceptDraw Arrows10 Technology included in ConceptDraw PRO Package is a powerful drawing software that changes the way diagrams could be created.

You don't have to guide your connectors, they do this automatically.

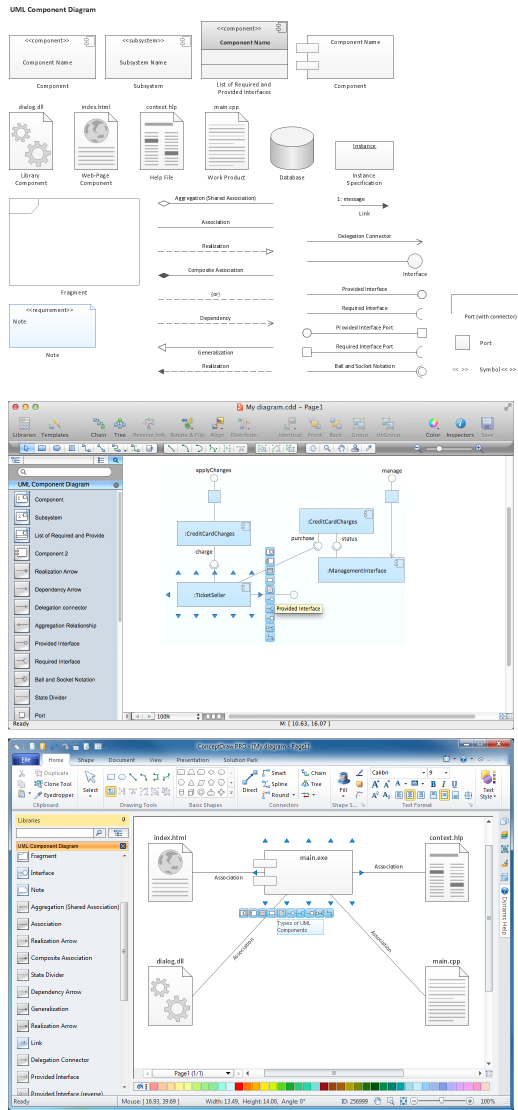

Get software for creating business graphics such as charts and graphs, diagrams, organizational charts, multimedia presentations, and visual demonstrations.

SYSML

The SysML solution helps to present diagrams using Systems Modeling Language; a perfect tool for system engineering.

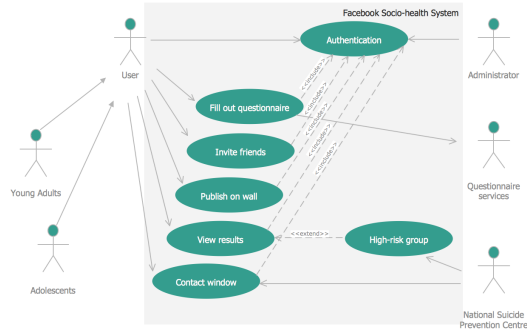

Diagramming Software for Design UML Component Diagrams

UML Component Diagram illustrate how components are wired together to larger components and software systems that shows the structure of arbitrarily complex systems. ConceptDraw Rapid UML solution delivers libraries contain pre-designed objects fit UML notation, and ready to draw professional UML Component Diagram.

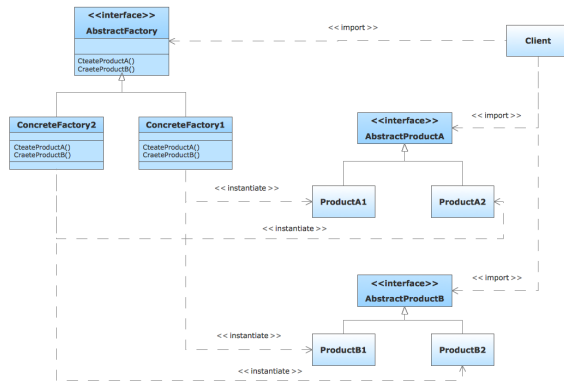

UML Use Case Diagram Example Social Networking

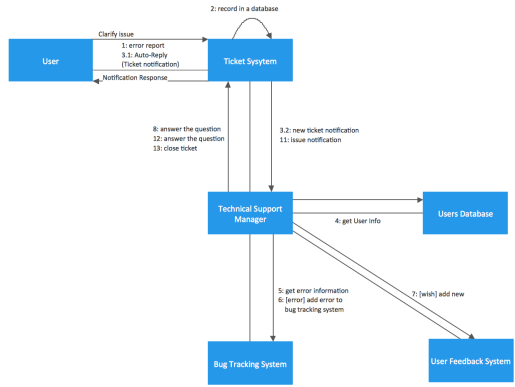

UML Diagrams Social Networking Sites Project. This sample was created in ConceptDraw PRO diagramming and vector drawing software using the UML Use Case Diagram library of the Rapid UML Solution from the Software Development area of ConceptDraw Solution Park. This sample shows the Facebook Socio-health system and is used at the projection and creating of the social networking sites.

UML Diagram Types List

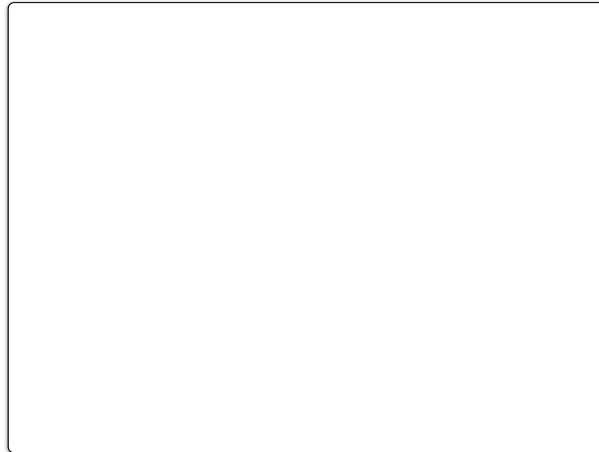

Two types of diagrams are used in UML: Structure Diagrams and Behavior Diagrams. Behavior Diagrams represent the processes proceeding in a modeled environment. Structure Diagrams represent the elements that compose the system.

UML Collaboration Diagram (UML2.0)

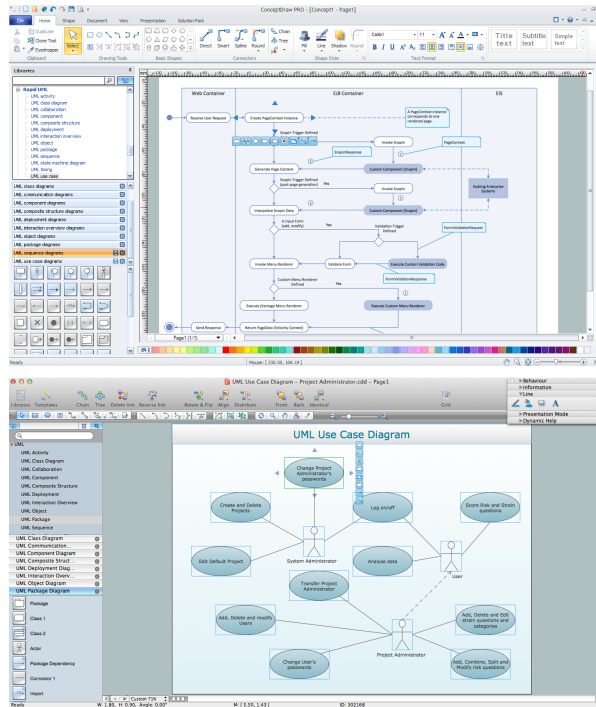

UML Collaboration Diagram depicts the interactions between objects or parts in terms of sequenced messages and describes both the static structure and dynamic behavior of a system.

Rapid UML solution provides templates, examples and libraries of stencils for quick and easy drawing all the types of system and software engineering diagrams according to UML 2.4 and 1.2 notations.

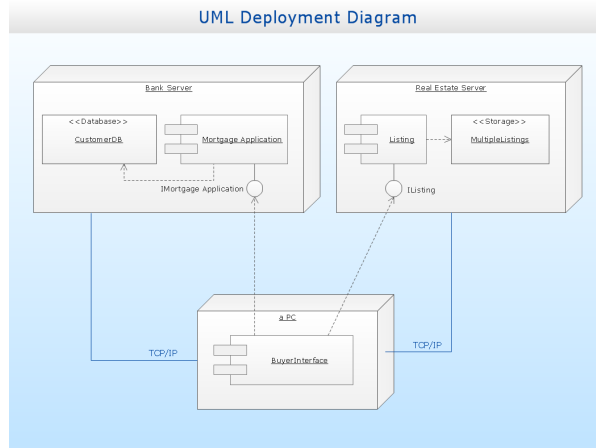

UML Diagramming Software

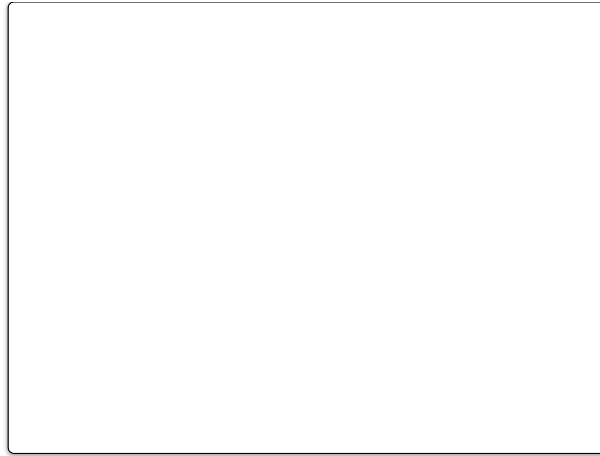

The UML Diagrams are widely used by software developers and software engineers. They can draw the UML Diagrams manually on the paper, but it is incredibly convenient to use the special UML diagramming software. The UML diagramming software allows you to draw the UML Diagrams in a few minutes.

UML Deployment Diagram

UML Deployment Diagram depicts the physical deployment of artifacts on nodes (nodes are the existing hardware components, artifacts are the software components running on each node); and how the different pieces are connected. Use ConceptDraw PRO with UML deployment diagram templates, samples and stencil library from Rapid UML solution to model the physical deployment of artifacts on nodes of your software system.
