

Observation

1. Create Inline, Internal and External style sheets and demonstrate their cascading order.

Execution

2. Apply Class and Id selectors to HTML registration form using an external style sheet
3. Use two colors to alternate between rows of a table
4. Use the HTML element li, anchor tag a to create different colored text links on a page

Ex. Style a {color: red}

Orange

Green

Red

Blue

Spot

1. Position the images supplied as simple clickable icons with captions for each of them in a row for navigation using CSS style sheet.

2. Design a Layout for a webpage using the Box Model

```
div { width: 300px; border: 25px solid green; padding: 25px; margin: 25px; }
```
